### IN THE CLAIMS

1. (Currently Amended) A portable device, which includes:

- a wireless communication module to communicate with each of a plurality of remote devices within a locality;
- a data storage module having a public storage area with which selected remote devices ~~exchange~~ store and retrieve data in a free manner, and a private storage area with which selected remote devices ~~exchange~~ store and retrieve data in a restricted manner; and
- a controller connected to the wireless communication module and to the data storage module, to define access rights to the first and second storage areas and allow remote devices to store and retrieve data from at least one of the first and second storage areas based upon the access rights, to establish a wireless communication link between the wireless communication module and a first remote device upon a determination ~~that~~ of services offered by the first remote device ~~are relevant~~ and to

Art Unit: 2617

grant the first remote device access ~~rights~~ to the public storage area and the private storage area based on a classification of the first remote device.

3. (Currently Amended) A portable device as claimed in Claim 1, in which the controller filters requests from each of the remote devices to ~~exchange~~ store and retrieve data and to reject and accept the requests in response to the nature of services offered by the remote device.

15. (Currently Amended) A data communication system, which includes:

a plurality of remote devices, each remote device including a wireless communication interface; and

at least one portable device, which includes:

a wireless communication module to communicate within a locality with the wireless communication interface the remote devices;

a data storage module having a public storage area with which selected remote devices ~~exchange~~ store and retrieve data in a free manner, and a private storage area with which selected remote devices ~~exchange~~ store and retrieve data in a restricted manner; and

a controller connected to the wireless communication module and to the data storage module, to define access rights to the first and second storage areas and allow remote devices to store and retrieve data from at least one of the first and second storage areas based upon the access rights, to establish a

wireless communication link between the wireless communication module and a first remote device upon a determination ~~that~~ of services offered by the first remote device ~~are relevant~~ and to grant the first remote device access ~~rights~~ to the public storage area and the private storage area based on a classification of the first remote device.

17. (Currently Amended) A system as claimed in Claim 15, in which the controller filters requests from each of the remote devices to ~~exchange~~ store and retrieve data and to selectively reject and accept the requests in response to the nature of services offered by the remote device.

21. (Currently Amended) A method which includes:

monitoring, by means of a portable device, wireless communications from a plurality of remote devices requesting communications with the portable device within a locality, the portable device including a public storage area with which selected remote devices ~~exchange~~ store and retrieve data in a free manner, and a private storage area with which selected remote devices ~~exchange~~ store and retrieve data in a restricted manner;

defining access rights to the first and second storage areas and allow remote devices to store and retrieve data from at least one of the first and second storage areas based upon the access rights;

identifying access rights associated with the remote device;

establishing a wireless communication link between the wireless communication module and a first remote device upon a determination ~~that~~ of services offered by the first remote device ~~are relevant~~; and

granting the first remote device access ~~rights~~ to the public storage area and the private storage area based on a classification of the first remote device.

22. (Currently Amended) A method as claimed in Claim 21, which includes ~~exchanging~~ storing and retrieving data in a relatively free manner between the first storage area, which defines a public data storage area, and the remote device, and ~~exchanging~~ storing and retrieving data in a relatively restricted manner between the second storage area, which defines a private data storage area, and the remote device.

25. (Currently Amended) A method as claimed in Claim 22 ~~24~~, in which the access rights are dependent upon a classification of the remote device by the portable device.

33. (Currently Amended) A computer program product including a medium readable by a computer, the medium carrying instructions which, when executed by the computer, cause the computer to:

monitor, by means of a portable device, wireless communications from a plurality of remote devices requesting communications with the portable device within a locality, the portable device including a public storage area with which selected remote devices exchange store and retrieve data in a free manner, and a private storage area with which selected remote devices exchange store and retrieve data in a restricted manner;

define access rights to the first and second storage areas and allow remote devices to store and retrieve data from at least one of the first and second storage areas based upon the access rights;

identify access rights associated with the remote device;

establishing a wireless communication link between the wireless communication module and a first remote device upon a determination ~~that~~ of services offered by the first remote device ~~are relevant~~; and

granting the first remote device access ~~rights~~ to the public storage area and the private storage area based on a classification of the first remote device.

34. (Currently Amended) A computer program product as claimed in Claim 33, in which data is ~~exchanged~~ stored and retrieved in a relatively free manner between the first storage area, which defines a public data storage area, and the remote device, and data is ~~exchanged~~ stored and retrieved in a relatively restricted manner between the second storage area, which defines a private data storage area, and the remote device.

37. (Currently Amended) A computer program product as claimed in Claim ~~33~~ 36, in which the access rights are dependent upon the classification of the remote device by the portable device.

[End Amendment]

2. Therefore, claims 1, 3, 5-15, 17, 19-23, 25-35, 37-42 are allowed and renumbered.
3. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach or suggest the new limitations to independent claims with the reasons set forth in the applicant's above amendment.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
